Course #41115

CPR and AED

OVERVIEW

The CPR & AED course is a streamlined onsite training program for organizations with limited time but also require a nationally accredited training program and course completion certificate. In just 2.5 to 3 hours, basic CPR and AED skills will be covered and include instructor demos and hands on student practice.

Conforming to the 2020 Guidelines Update for CPR and ECC, this course is flexible enough for lay responders, provides essentials for immediate medical response in the community or workplace and includes a course completion certificate.

TOPICS

- Scene hazard awareness & personal safety
- Assessing responsiveness
- Personal Protective Equipment & Blood-borne Pathogens
- Activation of 911 & EMS
- Defibrillator/AED awareness & operation
- High performance CPR
- Choking
