

# **CPR and AED – ADULT, CHILD, INFANT**

Course #41116

## OVERVIEW

The CPR & AED – Adult, Child, Infant is a combined training session covering CPR and AED skills for all age groups. This flexible, fast paced, hands-on course provides lifesaving medical training in a much shorter time period than traditional CPR courses. All participants receive a nationally recognized course completion certificate.

Conforming to the 2020 Guidelines Update for CPR and ECC, this training is ideal for workers who may respond to emergencies situations at work and at home.

## TOPICS

- Chain of survival
- Cardiac Arrest for adult/children/infants
- Chest compressions & rescue breathing skills
- Defibrillator/AED awareness & operation
- Choking & clearing an obstructed airway
