EMERGENCY MANAGEMENT WEBINAR

Course #41147

OVERVIEW

The Emergency Management Webinar program is designed to expand team understanding of procedures relative to general emergency management and flexibility in response using a tabletop exercise format. Emphasis is placed on disaster response during exercises which allow the team to make decisions as individuals and as a team.

Table top exercises are designed to assess individual team members' understanding of procedure, chain of command and basic priorities related to employee safety and protection of assets, continue team education and development in leadership skills.

This program may be customized to include site specific contacts, policies/procedures, and other company or required information (recommended).

TOPICS

- Hazard assessment & establishing a safe-first response
- Establishing an Emergency Operations Center
- Emergency notification procedures
- Corporate chain of command
- Disaster response table top exercises
