

EVACUATION *and* RELOCATION TRAINING

Course #41152

OVERVIEW

The Evacuation and Relocation training is designed to educate employee, staff and occupant Emergency Response Team (ERT) members in building specific evacuation procedures and floor warden programs. Exercise based training is included to increase retention and awareness of site specific procedures, equipment and locations.

This training is designed to meet employer and building owner/manager requirements under OSHA standard 1910.38 sections related to building evacuation procedures for employees and floor wardens.

Customization of this presentation allows for adding details of any specific information (contacts, chain of command, maps/other documentation, etc.), requires client supplied information and prearranged access to the facility.

TOPICS

- Alarm location, types & means of activation
- Evacuation vs. Relocation
- Emergency EXIT location & signage
- Roles & responsibilities
- Hazards related to smoke & fire
- Assembly Area location & accounting procedures
