

EVACUATION *and* RELOCATION WEBINAR

Course #41137

OVERVIEW

The Evacuation and Relocation Webinar is designed to educate employees, staff and occupant Emergency Response Team (ERT) members in building specific evacuation procedures and floor warden programs. This webinar session is intended to increase awareness of site specific procedures, equipment and locations and meet employer requirements under OSHA standard 1910.38 sections related to building evacuation procedures for employees, occupants, and floor wardens.

Customization allowing for adding site specific information (contacts, chain of command, maps/other documentation, etc.) is highly recommended.

TOPICS

- Alarm location, types & means of activation
- Evacuation vs. Relocation
- Emergency EXIT location & signage
- Roles & responsibilities
- Hazards related to smoke & fire
- Assembly Area location & accounting procedures
