

FIRE EXTINGUISHER TRAINING

Course #41154

OVERVIEW

The Fire Extinguisher on-site training supports training of employee, staff and occupant Emergency Response Team (ERT) member awareness of the safe use of multi-class (ABC type) fire extinguishers found most commonly in the workplace.

OSHA (1910.157) requires training for portable fire extinguishers when employees are delegated or allowed to use portable fire extinguishers and this program provides hands-on, confidence building experience in effective application of multi-class (A-B-C) portable fire extinguishers during a live fire exercise.

TOPICS

- Education on hazard classes & appropriate extinguisher type
- Hazards related to smoke & fire
- Fight or flight & safe use of portable fire extinguishers
- Hands-on demonstration & practice with live fire exercise

ADDITIONAL COURSE INFORMATION

Class Length.....1 hour
Class SizeUp to 12
Renewal PeriodN/A
Course Format.....On-site
Prerequisites.....None
CustomizationNot required

SAFETYMAX OFFERS THESE ADVANTAGES

Professional and engaging instructors
On-site training throughout the U.S. & Canada
Webinar / Online training options
Training administration and record keeping services
Meets OSHA requirements

Safetymax is pleased to partner with the following training providers and agencies
