

## **SHELTERING IN PLACE WEBINAR**

Course #41142

### OVERVIEW

This presentation is designed for employees, occupants and staff to give a broader understanding of the "Shelter in Place" concept combined with a practical understanding of facilities, tools and materials which can be applied for defense in a Hazmat (hazardous material) or similar emergencies where there is an immediate threat outside.

Understanding the context of the emergency and the ongoing professional response will support training of employee, staff and occupant Emergency Response Team (ERT) members to use available resources to protect themselves and others until the situation is resolved.

This program may be customized to include site specific contacts, policies/procedures, and other company or site specific information (recommended).

### TOPICS

- When and why you need to shelter in place
- How to shelter in place
- Shelter in place equipment / provisions

### ADDITIONAL COURSE INFORMATION

Class Length.....1 hour  
Class Size .....Up to 24  
Renewal Period .....N/A  
Course Format.....Webinar  
Prerequisites.....None  
Customization .....Recommended
